Total Habitat Cover	100
---------------------	-----

Other Site Characteristics

Hilly area with scattered oak-tree forests and single trees. Also meadows, pastures and deserted arable land. Suitable habitat for raptor birds and *Aquila heliaca* in particular. The Derventski vazvishenija - 1 site is closer to Sakar Mountains, while the Derventski vazvishenija - 2 site is closer to Strandja Mountains.

4.2 Quality and importance

High ornithological and botanical interest. A major bird migration route. Considerable number of rare and threatened species. Near the village of Sharkovo there are deserted fields, covered by low grass vegetation. There concentrate a great amount of *Melanocephala calandra*. The species enlisted as 'Other species-D' are included in Annex III of the Bulgarian Biodiversity Act as protected species.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site
