### Other Site Characteristics

The SCI includes part of the Konyavska Mountain. Some old growth oak and beech forests are conserved here. Around Viden Peak (proposed as a protected area) some rare grassy habitats are conserved.

### 4.2 Quality and importance

The zone protects representative limestone habitats, most priority with high diversity of protected plant species. The pSCI protects one of few remaining viable populations of land tortoises in the mountains surrounding the plane of Radomir. The SCI is a stepping-stone biocorridor for the Bear.
