## 1. SITE IDENTIFICATION

1.1 Type	1.2 Site code	<a href="#">Back to top</a>
B	BG0000605	

### 1.3 Site name

Bozhkova dupka
----------------

1.4 First Compilation date	1.5 Update date
2006-10	2015-07

### 1.6 Respondent:

Name/Organisation:	Ministry of Environment and Water, "National Nature Protection Service" Directorate
Address:	Sofia Kn. Maria Luiza Blvd. 22 1000 Sofia
Email:	natura2000@moew.gov.bgs

### 1.7 Site indication and designation / classification dates

Date site classified as SPA:	0000-00
National legal reference of SPA designation	No data
Date site proposed as SCI:	2007-03
Date site confirmed as SCI:	2008-12
Date site designated as SAC:	2015-02
National legal reference of SAC designation:	Designation Order No. RD - 101/09.02.2015 (promulgated SG 17 /2015) issued by the Minister of Environment and Water.
Explanation(s):	Adopted by Council of Ministers Decision No. 122/02.03.2007 (promulgated SG 21/2007). Issued by the Minister of Environment and Water designation Order No. RD - 101/09.02.2015 (promulgated SG 17 /2015) with prohibitions and restrictions on activities contradicting the conservation objectives of the site.

## 2. SITE LOCATION

### 2.1 Site-centre location [decimal degrees]:

[Back to top](#)

Longitude

26.3484

Latitude

43.6556

**2.2 Area [ha]:**

1.5988

**2.3 Marine area [%]**

0.0

**2.4 Sitelength [km]:**

0.0

**2.5 Administrative region code and name****NUTS level 2 code****Region Name**

BG32	Северен централен / Severen tsentralen
------	--

**2.6 Biogeographical Region(s)**

Continental (100.0 %)

**3. ECOLOGICAL INFORMATION****3.1 Habitat types present on the site and assessment for them**[Back to top](#)

Annex I Habitat types						Site assessment				
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C			
						Representativity	Relative Surface	Conservation	Global	
8310	B			1	G	A	C	B		A

- PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- Cover:** decimal values can be entered
- Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

**3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them**

Species					Population in the site					Site assessment				
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D. qual.	A B C D	A B C		
						Min	Max				Pop.	Con.	Iso.	Glo.
M	1352	<a href="#">Canis lupus</a>			p				P	DD	D			
M	1310	<a href="#">Miniopterus schreibersii</a>			p	11	50	i	P	M	C	A	C	A
M	1310	<a href="#">Miniopterus schreibersii</a>			c	11	50	i	C	M	C	A	C	A
M	1323	<a href="#">Myotis bechsteinii</a>			c				R	DD	D			
M	1316	<a href="#">Myotis capaccinii</a>			p	1	5	i	R	G	D			
M	1321	<a href="#">Myotis emarginatus</a>			c				P	DD	D			
M	1305	<a href="#">Rhinolophus euryale</a>			c	100	251	i	R	G	C	B	C	C
M	1304	<a href="#">Rhinolophus ferrumequinum</a>			p	51	100	i	C	G	C	B	C	C
M	1303	<a href="#">Rhinolophus hipposideros</a>			r	10	10	i		G	C	B	C	C

- Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- NP:** in case that a species is no longer present in the site enter: x (optional)
- Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

Species					Population in the site				Motivation					
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories			
					Min	Max			IV	V	A	B	C	D
I		<a href="#">Porhomma microps</a>						P					X	

- Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- NP:** in case that a species is no longer present in the site enter: x (optional)
- Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- Motivation categories:** IV, V: Annex Species (Habitats Directive), A: National Red List data; B: Endemics; C: International Conventions; D: other reasons

## 4. SITE DESCRIPTION

### 4.1 General site character

[Back to top](#)

Habitat class	% Cover
N22	100.0
Total Habitat Cover	100

#### Other Site Characteristics

The cave is 1200 meters east of the village of Krivnya in the middle of the rock massive between it and the town of Senovo. It is formed in Lower-Cretaceous limestone. Kulina dipka (Bojkova dupka, Kumnitsa) is the longest cave in the Ludogorie Mountains and fourth longest in the District of Ruse. Its total length is 326 m. It is branched, horizontal and dry, split in two parts. The floor of the first part is covered by fallen rocks. After 36 meters the gallery gets narrow and a pass leads to the second part of the cave. It consists of several halls, about 7-8 meters high and short branches. All branches end up with impassable narrow tunnels. The cave is scarce in secondary formations. Many parts are covered with a lot of bat guano (up to 120 cm in depth).

### 4.2 Quality and importance

One of the most significant caves for bat conservation in Bulgaria.

### 4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
M	G01.04		i
H	G05.04		i

Rank: H = high, M = medium, L = low

Pollution: N = Nitrogen input, P = Phosphor/Phosphate input, A = Acid input/acidification,

Positive Impacts			
Rank	Activities, management [code]	Pollution (optional) [code]	inside /outside [i o b]

T = toxic inorganic chemicals, O = toxic organic chemicals, X = Mixed pollutions  
i = inside, o = outside, b = both

#### 4.4 Ownership (optional)

#### 4.5 Documentation

Initial proposal and description of the site made by Teodora Ivanova, tea@lomea.org. Initially listed documents:BENDA P., T. IVANOVA, I. HORÁČEK, V. HANÁK, J. CHERVENÝ, J. GAISLER, A. GUEORGUIEVA, B.
