- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

Other Site Characteristics

The SCI includes immense coniferous and mixed forests. The area is almost unpopulated. Around Trigrad interesting rock formations are found. The SCI also includes some valleys with significant Mediterranean climatic influence (Eurocontinental Upper Meso-Mediterranean climate according to Rivas-Martinez): rivers Vucha, Kanina, Bistritza, Dospatska. The area is proposed as a natural park.

4.2 Quality and importance

This is the largest proposed SCI in Bulgaria and one of the largest in Europe. It is also key place for the conservation of the Bear without protecting this area from human impacts amd fragmentation, the future of the whole Rilo-Rhodopean population (including the Greek one) will be uncertain. The SCI protects important percentages of the national coverage (A and B values) of many habitats and species and that is why it is a unique site.

4.5 Documentation

Initial proposal and description of the site made by Balkani Wildlife Society, office@balkani.org; Green Balkans, office@greenbalkans.org; Bulgarian Biodiversity Foundation, bbf@biodiversity.bg; Wilderness Fund. Data revised by a team of Bulgarian Academy of Sciences (http://www.bas.bg). Data revised by a team of the Institute for Biodiversity and Ecosystem Research, Bulgarian Academy of Sciences and R. Tzonev - Sofia University. New data provided by project "Mapping and assessment of the conservation status of the natural habitats and species - Phase 1" (see link). New information on the distribution of habitat type 9560* obtained through field study in the period 2018-2021 within the project LIFE16 NAT/BG/000856 - IAS Free Habitats, resulting also in correction of the area of habitat types 8220, 91M0, 9170 and 5130.
