- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

#### Other Site Characteristics

Zvanichevo Fishponds are located to the west of Pazardzhik, in the region between the rivers of Maritsa and Topolnitsa, in the grounds of the villages of Boshulya, Velichkovo, Yunatsite, Dragor, Mokrishte, Zvanichevo and Kovachevo. It is a complex of extensive used fishponds and small basins located on the two sides of the Maritsa River. The area includes also the wet meadows and farmlands between the Maritsa and the Topolnitsa, the two riverbeds and the place where the Topolnitsa River joins the Maritsa River. The different basins of the fishponds are between 36% and 65% overgrown with water fringe vegetation, mainly *Phragmites australis*, *Scirpus lacustris*, *Scirpus triqueter* and *Bolbochoenus maritimus*. The open water surface is partly covered by *Trapa natans*, *Hydrocharis morsus-ranae*, *Salvinia natans*, *Ceratophyllum demersum*, *Potamogeton* spp., etc. The Maritsa River banks are overgrown of riverine forest of willow (*Salix alba*, *Salix fragilis*), poplar (*Populus nigra*, *Populus alba*) and Black Alder *Alnus glutinosa*.

#### 4.2 Quality and importance

Zvanichevo Fishponds supports 96 bird species, 24 of which are listed in the Red Data Book for Bulgaria (1985). Of the birds occurring there 34 species are of European conservation concern (SPEC) (BirdLife International, 2004), 3 of them being listed in category SPEC 1 as globally threatened, 10 in SPEC 2 and 21 in SPEC 3 as species threatened in Europe. The area provides suitable habitats for 27 species, included in Annex 2 of the Biodiversity Act, which need special conservation measures, of which 22 are listed also in Annex I of the Birds Directive. Zvanichevo fishponds are the only place in the Tracian Plain where the Whiskered Tern *Chlidonias hybridus* breeds. It is one of the most important sites in the country on European Union scale for the conservation of this species, as well as for the Ferruginous Duck *Aythya nyroca*, which breed there in considerable numbers. The complex has a great value during migration and in winter for a big number of waterfowl species. It is of global importance for the Great White Egret *Egretta alba* that forms there congregations bigger than 1% of its biogeographical population. The globally threatened Pygmy cormorant *Phalacrocorax pygmeus* regularly use the area as feeding ground during the winter. The Crane *Grus grus* is observed there during migration.

#### 4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

## 5. SITE PROTECTION STATUS (optional)

[Back to top](#)

### 5.1 Designation types at national and regional level:

| Code | Cover [%] | Code | Cover [%] | Code | Cover [%] |
|------|-----------|------|-----------|------|-----------|
| BG00 | 100.0     |      |           |      |           |

### 5.2 Relation of the described site with other sites:

designated at international level:

| Type  | Site name | Type | Cover [%] |
|-------|-----------|------|-----------|
| Other | IBA       | =    | 100.0     |

### 5.3 Site designation (optional)

Zvanichevo fishponds do not have legal protection status according to the Bulgarian nature conservation legislation. In 2005 it was designated as Important Bird Area by BirdLife International.

## 6. SITE MANAGEMENT

[Back to top](#)

### 6.1 Body(ies) responsible for the site management:

|               |   |
|---------------|---|
| Organisation: | Regional Inspectorate of Environment and Water - Pazardzhik; East-Aegean River Basin Directorate; |
| Address:      |   |
| Email:        |   |

### 6.2 Management Plan(s):

An actual management plan does exist:

|                                     |                        |
|-------------------------------------|------------------------|
| <input type="checkbox"/>            | Yes                    |
| <input type="checkbox"/>            | No, but in preparation |
| <input checked="" type="checkbox"/> | No                     |

### 6.3 Conservation measures (optional)

## 7. MAP OF THE SITES
