Other Site Characteristics

Noevtsi meadows are located in south-western Bulgaria, about 10 km south-west of the town of Breznik. Their territory is divided in two by the Giginska River a tributary of the Konska River. The site covers almost the whole cupola hill of Cherna Gora and the Strazha mountain foothills to the north-west, between the villages Krivonos, Rebro, Sadovik, Begunovtsi, Kosharevo and Stanyovtsi. It includes several types of habitats, most valuable of which are the open grasslands of mesophyle grass formations with domination of *Festuca pratensis*, *Poa sylvicola*, etc. wet meadows and pastures, surrounded by shrubs and broadleaved forests.

4.2 Quality and importance

Noevtsi meadows are of global importance for the conservation of the Corncrake *Crex crex*, which breeds there in numerous population.
