| <b>Date site confirmed as SCI:</b>                  | 2008-12                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Date site designated as SAC:</b>                 | 2021-03                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>National legal reference of SAC designation:</b> | Designation Order No. RD - 318/ 31.03.2021 (promulgated SG 49 /2021) issued by the Minister of Environment and Water.                                                                                                                                                                                                                                                                                    |
| <b>Explanation(s):</b>                              | Adopted by Council of Ministers Decision No. 122/02.03.2007 (promulgated SG 21/2007). Extended by Council of Ministers Decision No. 811/16.11.2010 (promulgated SG 96/2010). Issued by the Minister of Environment and Water designation Order No. RD - 318/ 31.03.2021 (promulgated SG 49/2021) with prohibitions and restrictions on activities contradicting the conservation objectives of the site. |

## 2. SITE LOCATION

### 2.1 Site-centre location [decimal degrees]:

[Back to top](#)

Longitude

23.0506

Latitude

43.785

2.2 Area [ha]:

2949.4139

2.3 Marine area [%]

0.0

2.4 Sitelength [km]:

0.0

2.5 Administrative region code and name

NUTS level 2 code

Region Name

|      |                               |

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

- **Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

### 3.3 Other important species of flora and fauna (optional)

- **Group:** A = Amphibians, B = Birds, F = Fish, Fu = Fungi, I = Invertebrates, L = Lichens, M = Mammals, P = Plants, R = Reptiles
- **CODE:** for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name
- **S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Unit:** i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))
- **Cat.:** Abundance categories: C = common, R = rare, V = very rare, P = present
- **Motivation categories:** IV, V: Annex Species (Habitats Directive), A: National Red List data; B: Endemics; C: International Conventions; D: other reasons

## 4. SITE DESCRIPTION

### 4.1 General site character

[Back to top](#)

| Habitat class | % Cover |
|---------------|---------|
| N06           | 18.0    |
| N10           | 13.0    |
| N07           | 38.0    |
| N09           | 18.0    |
| N16           | 1.0     |
| N08           | 1.0     |

|                     |      |
|---------------------|------|
| N20                 | 11.0 |
| Total Habitat Cover | 100  |

#### Other Site Characteristics

The site comprises the former Orsoya marsh, located at the bank of the Danube. It also includes a group of islands and a part of the bank, covered by forest vegetation. There are systems of dikes, canals, pumps and other draining facilities. The main habitats in the former marsh are the areas, covered by marsh vegetation, where reed and rush communities dominate. There are also open water surfaces as well as humid meadows. The cultivation of the arable land depends on the success of the draining activities.

#### 4.2 Quality and importance

The site is a former floodplain, which was drained. The arable lands were used, but now are abandoned. There is a natural restoration of the former marshes. There are sand dunes in the plain, which cover very big area. They are the most representative in Bulgaria. The former breeding-ponds of Orsoya are abandoned and now they are with natural regime of flooding and are covered by different aquatic plant communities. The near Kovachev (Dobrina) Island is covered by natural alluvial forest (Salix, Populus, Ulmus, Quercus robur, Fraxinus oxycarpa).

#### 4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

| Negative Impacts |                              |                             |                        |
|------------------|------------------------------|-----------------------------|------------------------|
| Rank             | Threats and pressures [code] | Pollution (optional) [code] | inside/outside [i o b] |

## 5. SITE PROTECTION STATUS (optional)

### 5.1 Designation types at national and regional level:

[Back to top](#)

| Code | Cover [%] | Code | Cover [%] | Code | Cover [%] |
|------|-----------|------|-----------|------|-----------|
| BG06 | 5.33      | BG00 | 94.67     |      |           |

### 5.2 Relation of the described site with other sites:

designated at national or regional level:

| Type code | Site name         | Type | Cover [%] |
|-----------|-------------------|------|-----------|
| BG06      | Ribarnitzi Orsoya | +    | 5.33      |

### 5.3 Site designation (optional)

This is the most important site in Bulgaria for the habitat 2340 - inland dunes. There is a big diversity of habitats, plants and animals (especially birds), which are with nature-conservation importance. The site is Important Bird Area.

## 6. SITE MANAGEMENT

### 6.1 Body(ies) responsible for the site management:

[Back to top](#)

|               |                                                         |
|---------------|---------------------------------------------------------|
| Organisation: | Regional Inspectorate of Environment and Water: Montana |
| Address:      |                                                         |
| Email:        |                                                         |

### 6.2 Management Plan(s):

An actual management plan does exist:

|                                     |                        |
|-------------------------------------|------------------------|
| <input type="checkbox"/>            | Yes                    |
| <input type="checkbox"/>            | No, but in preparation |
| <input checked="" type="checkbox"/> | No                     |

### 6.3 Conservation measures (optional)

Restoration of the natural alluvial forests. Stopping of the illegal excavations on the dunes. Restoration of part from the former marshes on the place of the breeding-ponds.

## 7. MAP OF THE SITES

INSPIRE ID:

Map delivered as PDF in electronic format (optional)

Yes  No

Reference(s) to the original map used for the digitalisation of the electronic boundaries (optional).
